

FOOTNOTES
1980 CENSUS SUMMARY TAPE FILE 3

Footnotes refer to numbers in parentheses on Summary Tape File 3A Tables.

The letters "SUPP" indicate suppressed data.

- (1) Vacant Seasonal/migratory units are excluded from all matrices except as noted specifically in the table headings and footnotes.
- (2) The farm population is defined as persons living in rural territory on places from which \$1,000 or more of farm products were sold in 1979. In 1970, the definition included all rural places with sales of \$250 or more, plus rural places of 10 or more acres with sales of \$50 to \$249.
- (3) The count of households in sample tabulations may differ from the number of occupied housing units. This is a result of the weighting process used to minimize differences between complete counts and sample estimates. An indication of the type of weight (population or housing) for each matrix is listed in footnote 50.
- (4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.
- (5) For data tabulated on a 100-percent basis, includes all persons in the category "other." For data tabulated from the sample, excludes those persons who have a write-in entry of an Asian and Pacific Islander group in the "other" category.
- (6) This category refers to write-in entries of Spanish groups in the race question. Such entries are not necessarily consistent with responses in the Spanish origin question.
- (7) Tabulations of "persons in household" based on 100-percent data by definition are the same as tabulations of "persons in unit." The phrase "persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "persons in unit" is used. Tabulations of "persons in household" and "persons in unit" based on sample data are not necessarily the same because of differences in the procedures used to inflate sample population and housing data.
- (8) Relatives include householder, spouse, and the questionnaire categories: "son/daughter," "brother/sister," "father/mother," and "other relative." Tabulations of "other relatives" include all categories not shown separately in the matrix.
- (9) "Nonrelatives" include the questionnaire categories: "roomer, boarder," "partner, roommate," "paid employee," and "other nonrelative." Tabulations of "nonrelatives" include all categories not shown separately in the matrix.
- (10) A "child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "nonrelative" category.

In subfamilies an "own child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.
